

Welcome to AutoShift: Showroom Manager

Thank you for choosing AutoShift. This guide will help you get your showroom up and running with your new AI-powered, offline-first management system.

1. First-Time Setup

Before you start, ensure your developer has initialized your database.

1. **Install the App:** Run `AutoShift_Setup.exe` and follow the on-screen instructions.
 2. **Configure Credentials:**
 - Open the installation folder (Right-click the AutoShift desktop icon > **Open File Location**).
 - Run the file named `configure_showroom.bat`.
 - Enter your Supabase, Twilio, and Gemini keys as provided in your setup package.
 - Set your **Staff PIN** (for daily use) and **Admin PIN** (for owner-only actions).
-

2. Daily Operations

Accessing the System

When you open AutoShift, you will see a secure numpad. Enter your **Staff PIN** to unlock the dashboard.

Managing Vehicles & Services

- **Search:** Use the “Vehicle Lookup” to find existing cars by plate number.
 - **Register:** If a car is new, click “Register” to add the vehicle and the client details.
 - **Service:** Click “Add Service” on any vehicle page to log oil changes, inspections, or repairs.
-

3. Premium Features

Offline Mode (High Reliability)

Don't let the internet slow you down! If your internet goes out, AutoShift keeps working. * The **Cloud Icon** in the sidebar will turn **Red (Offline)**. * You can still add cars and services normally. * The system will **automatically sync** all your changes to the cloud the moment your internet returns.

Admin Mode (Security)

To protect your data, destructive actions like “Delete Vehicle” or “Edit Details” are locked. * Click “**SWITCH TO ADMIN**” at the bottom of the sidebar. * Enter your secret **Admin PIN**. * This mode should only be used by the owner or trusted managers.

AI Smart Outreach

AutoShift uses Google Gemini AI to bring customers back to your showroom. * **Automated Reminders**: Every morning, the system checks which cars are due for service and sends personalized messages. * **Note**: Ensure you have active credits in your **Twilio** and **Gemini** accounts for these features to remain active.

Support

If you encounter any issues or need to update your system, please contact your technical administrator.
